# Push notifications

Instant Marketing to all users

## News & Offers

Use the app to its full potential by sending direct information straight to your Customers phones through push notifications

## Notifications

These notifications notify the Customers mobile device and will include a snippet of the information you have decided to send such as offers regarding your business.

# Real time information

Keep your customers up to date

Save time and money on printing and designing each year by having all your information up to date and available to your Customers at all times on your APP

Printing media often becomes out of date relatively quickly. With the CMS system, ClubWifi can ensure all the information, as well as images and direct links are up to date.

## App Client Testimonial

# Harford Bridge Park

Paul Williamson

“ Our mobile app was delivered ready for the 2020 season. It powers some business operations, supports our marketing, and delivers guest fulfilment. With rich curated content it enables our guests to easily discover why our park is special and maximises their holiday experience. It also supports remote ordering of fresh product, shop goods and guest interaction with our Park Team.

Throughout our app ownership experience the Club Wi-Fi team have provided excellent support promptly and have helped expand the app's capability to reach to guests and, importantly, potential guests. We think it has been a significant factor in driving interest, bookings and repeat business for our park. ”

# Powerful Features

Enhance your Customer's experience onsite

Your bespoke app can be full of powerful features such as

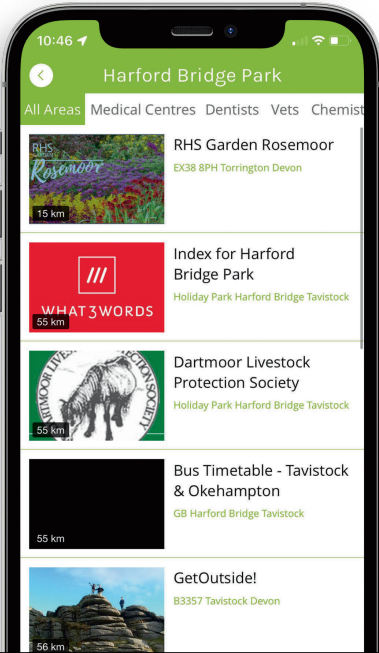

- Ordering with an Online Shop
- Making Reservations
- Submitting feedback forms
- Link to your Social Media Accounts
- Direct contact to your business
- User Data Capture
