and how it helps your customers.**

Lodge WiFi

from ClubWifi

1. High Speed Cable Network

THE SPECIFICS

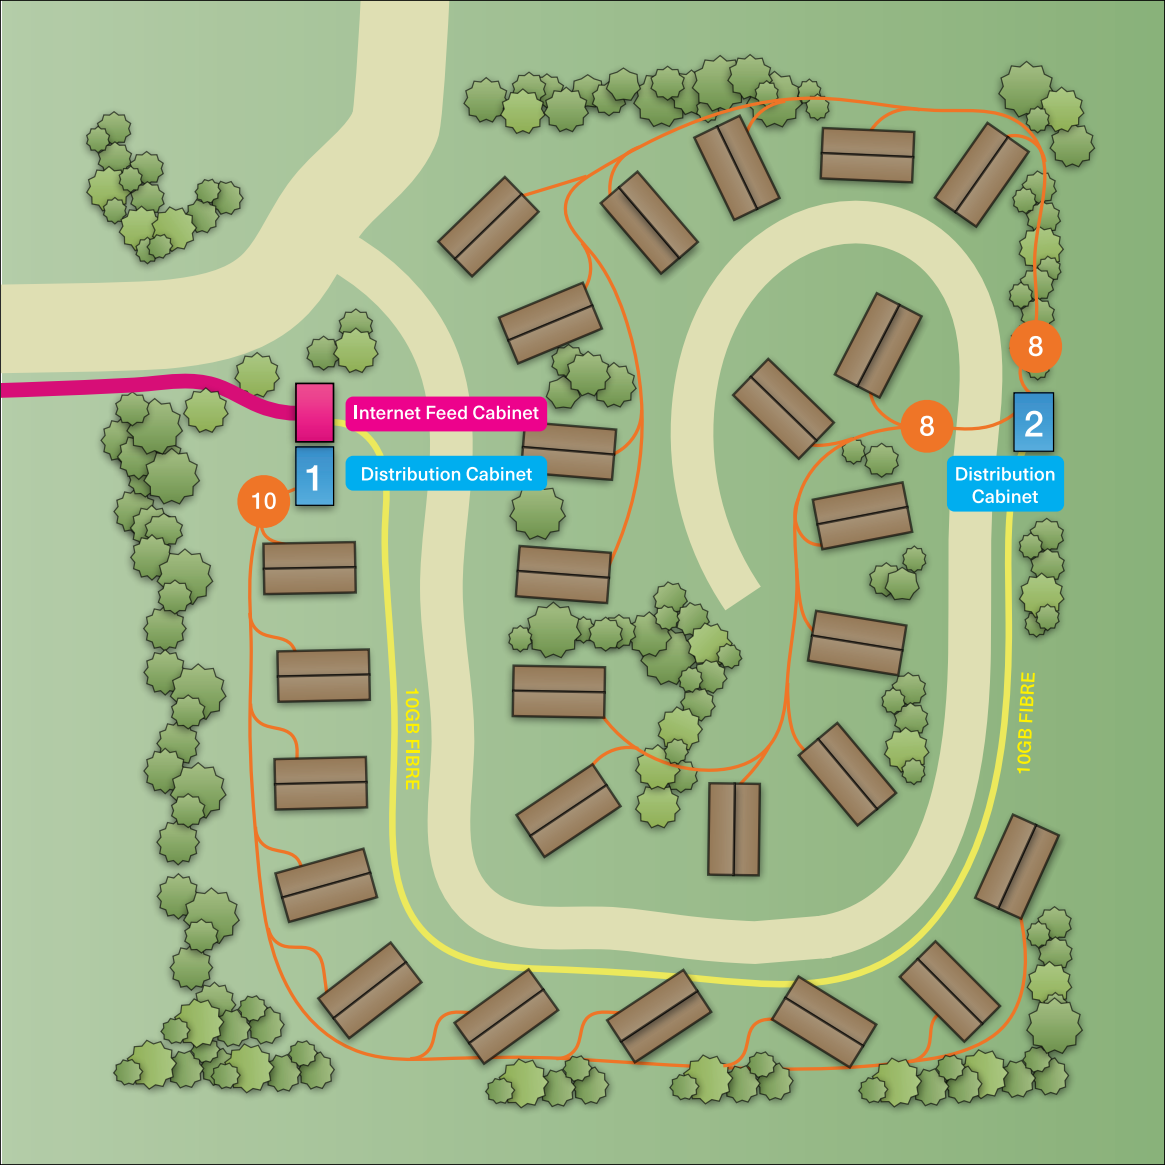

Cabled Solutions

Each lodge has its own access point for multi device connectivity at very high speeds.

Secure and Simple Login

The Wifi connects automatically whenever guests return - the system remembers the onetime password, to all wifi devices.

This creates a true home from home experience.

Static Park WiFi

from ClubWifi

2. Point to Point Wireless

THE SPECIFICS

Point to Point

When cabling isn't an option a Point to Point solution provides the Customer the home from home experience that they expect.

24/7 ClubWifi Support

ClubWifi Supports the network as well as your Customers' devices to ensure everything runs smoothly.

Touring Park WiFi

from ClubWifi

3. Access Point Broadcasting

THE SPECIFICS

Access Point Broadcasting

Traditional Park Wifi uses Access Point Broadcasting, a bridge unit usually based at the Reception feeds internet wirelessly to antennas around the site. This gives a blanket wifi effect so that users can connect across site. These solutions are best suited to Touring and Camping Parks.

CASE STUDY

Harford Bridge Park

Paul Williamson

“ Our lodge home owners expect the best, we have used ClubWifi to install and set up our fibre network along with 1gb Lease Line to feed all the lodges - the results are amazing!

The feedback from our lodge owners has been fantastic, everyone is now connecting their devices and streaming content regularly. All access points are hidden and connections are automatic - exactly what you want when you are on holiday! I would recommend ClubWifi and their solution to anyone and everyone. We have partnered with ClubWifi for many years and it has always been an extremely positive partnership! ”

CASE STUDY

Bossiney Bay Lodge Park

Glenda Richardson - Park Owner

“ Heidi and all the team at ClubWiFi Ltd installed new Wi-Fi at our holiday park, Cornwall in March 2020 (just before the Covid lockdown). The installation was handled in a competent and professional manner.

Any issues or teething problems we have had, have been dealt with efficiently, promptly and in a friendly manner and to my satisfaction with no disruption for us, owners or any of our guests. Heidi calls regularly to ensure all is okay, and to see if there is anything she can assist me with. Now the travel restrictions have been lifted, park visits will happen too. So all in all a fabulous service! ”

Network Security

Keeping users safe and secure

It is vital to us at ClubWifi, that all public network users remain safe when using the internet. All our networks have content filtering and safe to surf solutions in place. Each connection is individual and is managed through the ClubWifi Servers at all times.

The UDM PRO also acts as a secure Firewall as well as a digital CCTV solution. This is also capable of handling door entry systems all in one.
